
P74 – ASSET MANAGEMENT POLICY

Basslink Pty Ltd (BPL) operates and maintains Basslink, the high voltage direct current electricity interconnector that links the Victorian and Tasmanian electricity grids by a 400kV direct current (DC) monopole electricity connector with a metallic return. The interconnector includes land and subsea components.

BPL is a wholly owned subsidiary of Keppel Infrastructure Trust (KIT), a Singapore-based Infrastructure Trust, who purchased Basslink in August 2007.

BPL commits to effective asset management as we recognise it enables us to realise value from our assets in the achievement of our business objectives. In fulfilling this commitment, we seek to achieve an overall level of asset management performance appropriate to the nature and scale of our organisation, its assets and operations.

In doing so BPL will:

- Ensure this policy, strategic asset management plan and asset management objectives are established and compatible with business objectives,
- Ensure this policy supports other relevant business policies,
- Integration of our asset management system requirements with other business processes,
- Ensure that training and necessary resources for the asset management system are made available,
- Comply with all applicable laws and regulations related to asset management, as well as any voluntary standards to which we subscribe,
- Participate in the development of laws and regulations that may impact upon the management of our assets and business,
- Establish, and continually improve our asset management system,
- Communicate the importance of effective asset management and conforming with our asset management system requirements,
- Set and review targets and objectives,
- Periodically monitor and audit our asset management performance to prevent, or reduce undesired effects, and
- Report regularly to stakeholders on our asset and asset management system performance.

To comply with this policy and support the business and asset management objectives, BPL will:

- Maximise availability while minimising the number of service interruptions to the Basslink interconnector,
- Comply with the requirements and objectives of the BPL Strategic Asset Management Plan,
- Use a risk-based approach to assess risks and opportunities that change over time and plan actions to address them,
- Establish, implement and maintain an asset management system that conforms to the requirements of ISO 55001:2014, taking into consideration the balance between performance, cost and risks,
- Plan the integration and implementation of actions required by our asset management system including evaluating the effectiveness of these actions,
- Direct and support staff, contractors and other relevant third parties to contribute to the effectiveness of our asset management system,
- Identify roles and responsibilities for the implementation and compliance of our asset management system, and
- Confirm compliance with this asset management policy, including details of any weaknesses and improvement actions and report these to BPL's Chief Executive Officer.

Malcolm Eccles
Chief Executive Officer
Basslink Pty Ltd

July 2020¹

¹ *This Policy supersedes all preceding versions of the Asset Management Policy.*
